

Support CCTRA!

(How can I help?)

Volunteers are the backbone of the Cassidy's Cause program. Previous experience with horses or disabled individuals is not required. CCTRA offers a comprehensive volunteer orientation training program for the care of the horses and the riders.

Many willing hands are always needed and welcome to continue helping CCTRA riders succeed. An average riding lesson pairs one rider with three volunteers: a leader for the horse and two side-walkers, plus an instructor. Volunteers are also needed to assist with barn activities, farm maintenance, office duties, fundraising, planning social activities and much more. Whatever your skills and talents, you will find a home for them here at Cassidy's Cause. **Join us today!** You will never receive more from giving, as you will with our special riders.

Our Mission... is to provide individuals with disabilities the opportunity to grow and develop through therapeutic, educational and recreational activities, while on a horse.

Founded in 2013 by Mike & Angie Falconite and Dara Triplett in honor of Cassidy Triplett whose love for horses continues to inspire others.

CONTRIBUTIONS TO CASSIDY'S CAUSE SHOULD BE MAILED TO:

Cassidy's Cause

Horsemanship International

— MEMBER —

Cassidy's Cause Therapeutic Riding Academy is a Professional Association of Therapeutic Horsemanship International center and our instructors are **PATH**, Intl. certified

What We Do

Cassidy's Cause Therapeutic Riding Academy helps individuals move beyond the confines of their bodies and disabilities into new, unexplored worlds. Watching individuals interact with horses and gain confidence and self-esteem is truly an unforgettable experience. Proud parents observe their children sitting tall in the saddle, smiling brightly and laughing uncontrollably while riding horses.

For individuals with impaired mobility, horseback riding gently and rhythmically moves their bodies in three planes: forward & backward, side to side and up & down. Riders experience increased balance, muscle control and strength. Horseback riding helps individuals with learning or cognitive disabilities improve their concentration, recognition, vocabulary and task completion. The unique bond formed with the horse can help improve personal relationships, patience and behavior among individuals with psychological or emotional disabilities.

Helping make a positive difference in the lives of individuals who deal with one or more disabilities on a daily basis.

Visit our Facility!

Cassidy's Cause Therapeutic Riding Academy's state of the art facility sits on 22 acres of beautifully groomed pastures. The rolling country side provides a relaxing environment that some might consider therapy in itself. CCTRA has become a home away from home for students, parents, volunteers and all who visit.
